

2381

Potential Candidate(s) for NESHAP & CM Inspection

JUN 17 1976

R. M. Buckhofer, Director
Michigan-Ohio District Office

David Lee, Chief, Air Enforcement Branch, 5/E

Don Wallgren, Deputy Director
Surveillance & Analysis Division, 5/S

Attached is correspondence, including EPA Form 7600-1, from the Penwalt Corporation, Wyandotte, MI. Mr. Charles Gullickson of Penwalt was advised 6/14/76 that it would be forwarded to the Regional Office and that future correspondence should be so addressed. This material is forwarded for your information and appropriate action.

Reference is made to Page 4 of 5 of the form indicating the City of Riverview landfill site is used for asbestos disposal and to MODO memos of March 21, 1976 (copy furnished to you) and May 24, 1976 to Tim Votta/ajo on a similar subject. As noted in those memos, this office had anonymous citizen reports of the use of the Riverview landfill site for asbestos disposal. The attached information appears to confirm the use of the site for asbestos disposal even though the site is not approved by the County Health agency for such use. The site is surrounded by residential housing and a municipal golf course is adjacent to the "landfill". The landfill is proposed for recreational use upon completion.

An asbestos-NESHAP CM inspection at Penwalt facility 12/3/75 by M. Tremblay, MODO, (memo report 12/15/75 to Air Surveillance Branch) indicated apparent compliance; however, we again recommend investigation of waste hauling and ultimate disposal practices.

By copy of this memo to B. G. Constantelos, Compliance and Engineering Section, Enforcement Division, we recommend consideration of the Penwalt facility, NPDES MI 0002381, for water compliance monitoring to evaluate the potential of an asbestos discharge to the international waters of the Detroit River.

Please contact R. M. Buckley at Grosse Ile should you have questions.
